1 Design

The development process included extensive design iterations to achieve the optimal user interface. This section showcases the evolution of the design from initial concepts to the final implementation.

1.1 Design Iterations

Multiple design versions were created and evaluated based on usability, aesthetics, and alignment with project requirements.

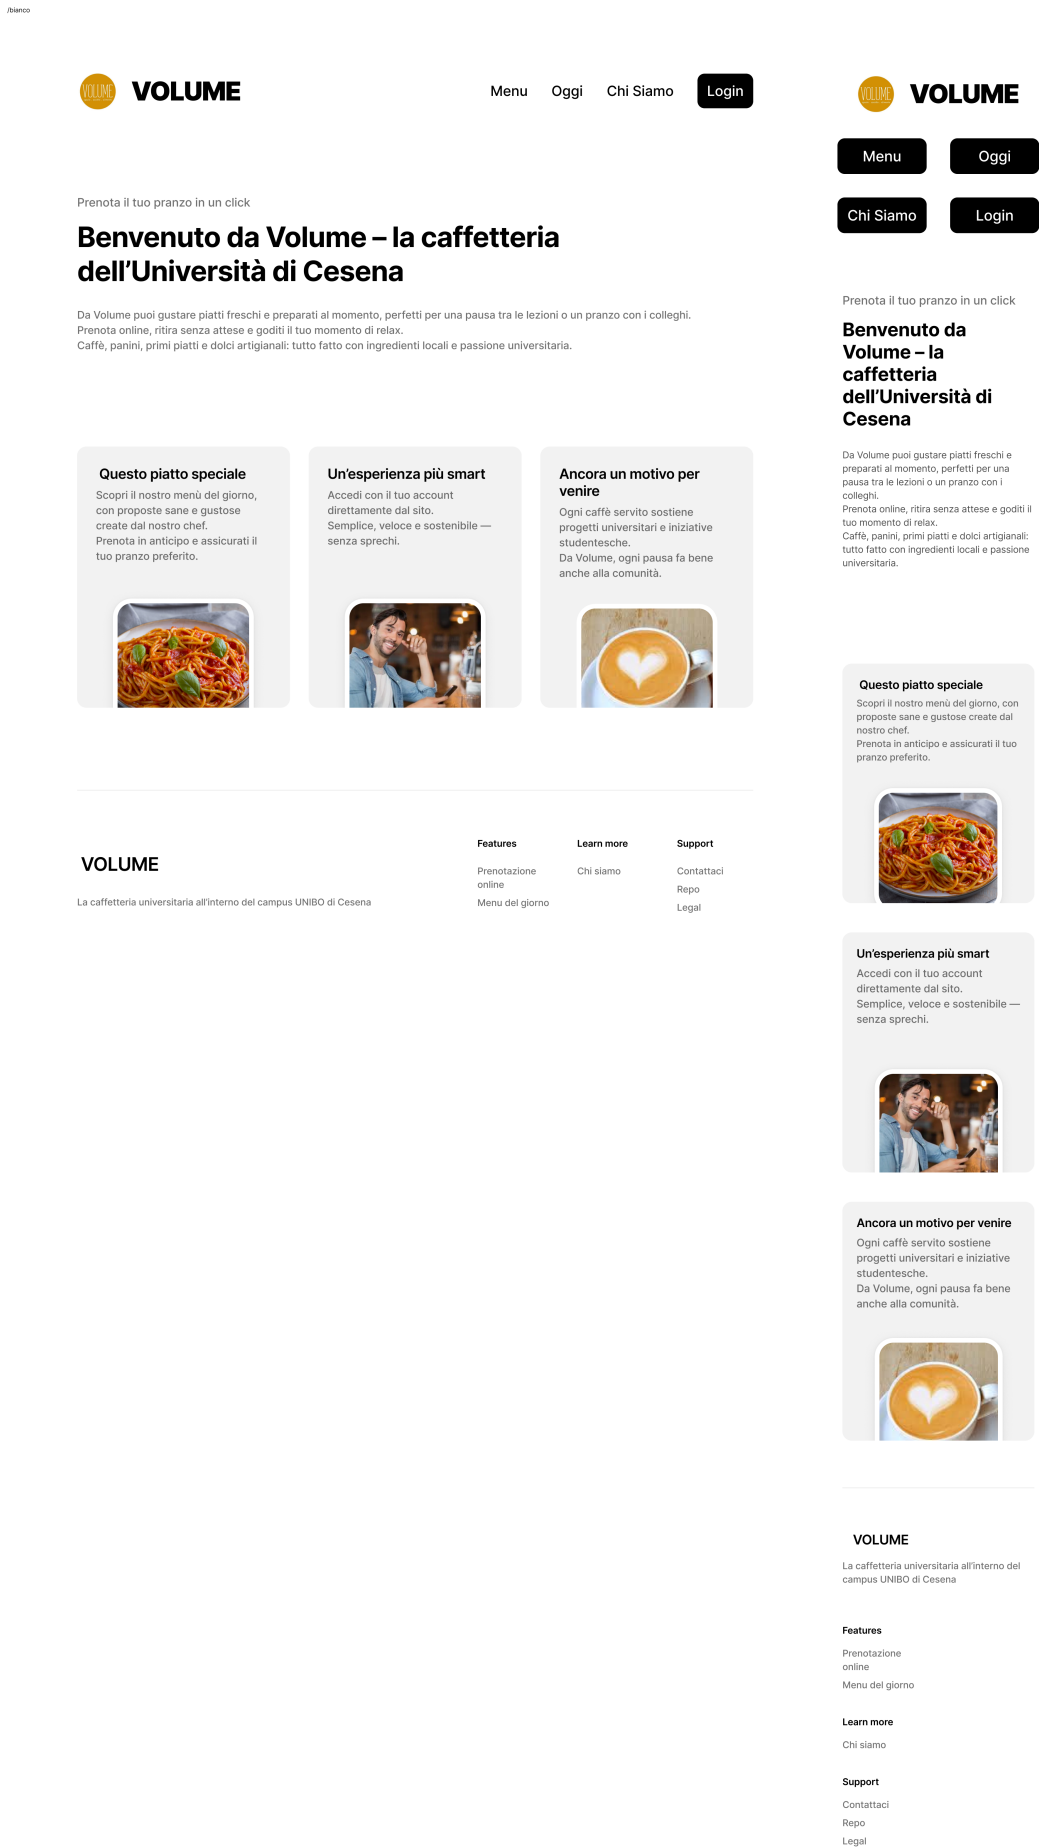

Figure 1: All White Version - Initial minimalist approach with clean white background

/verde

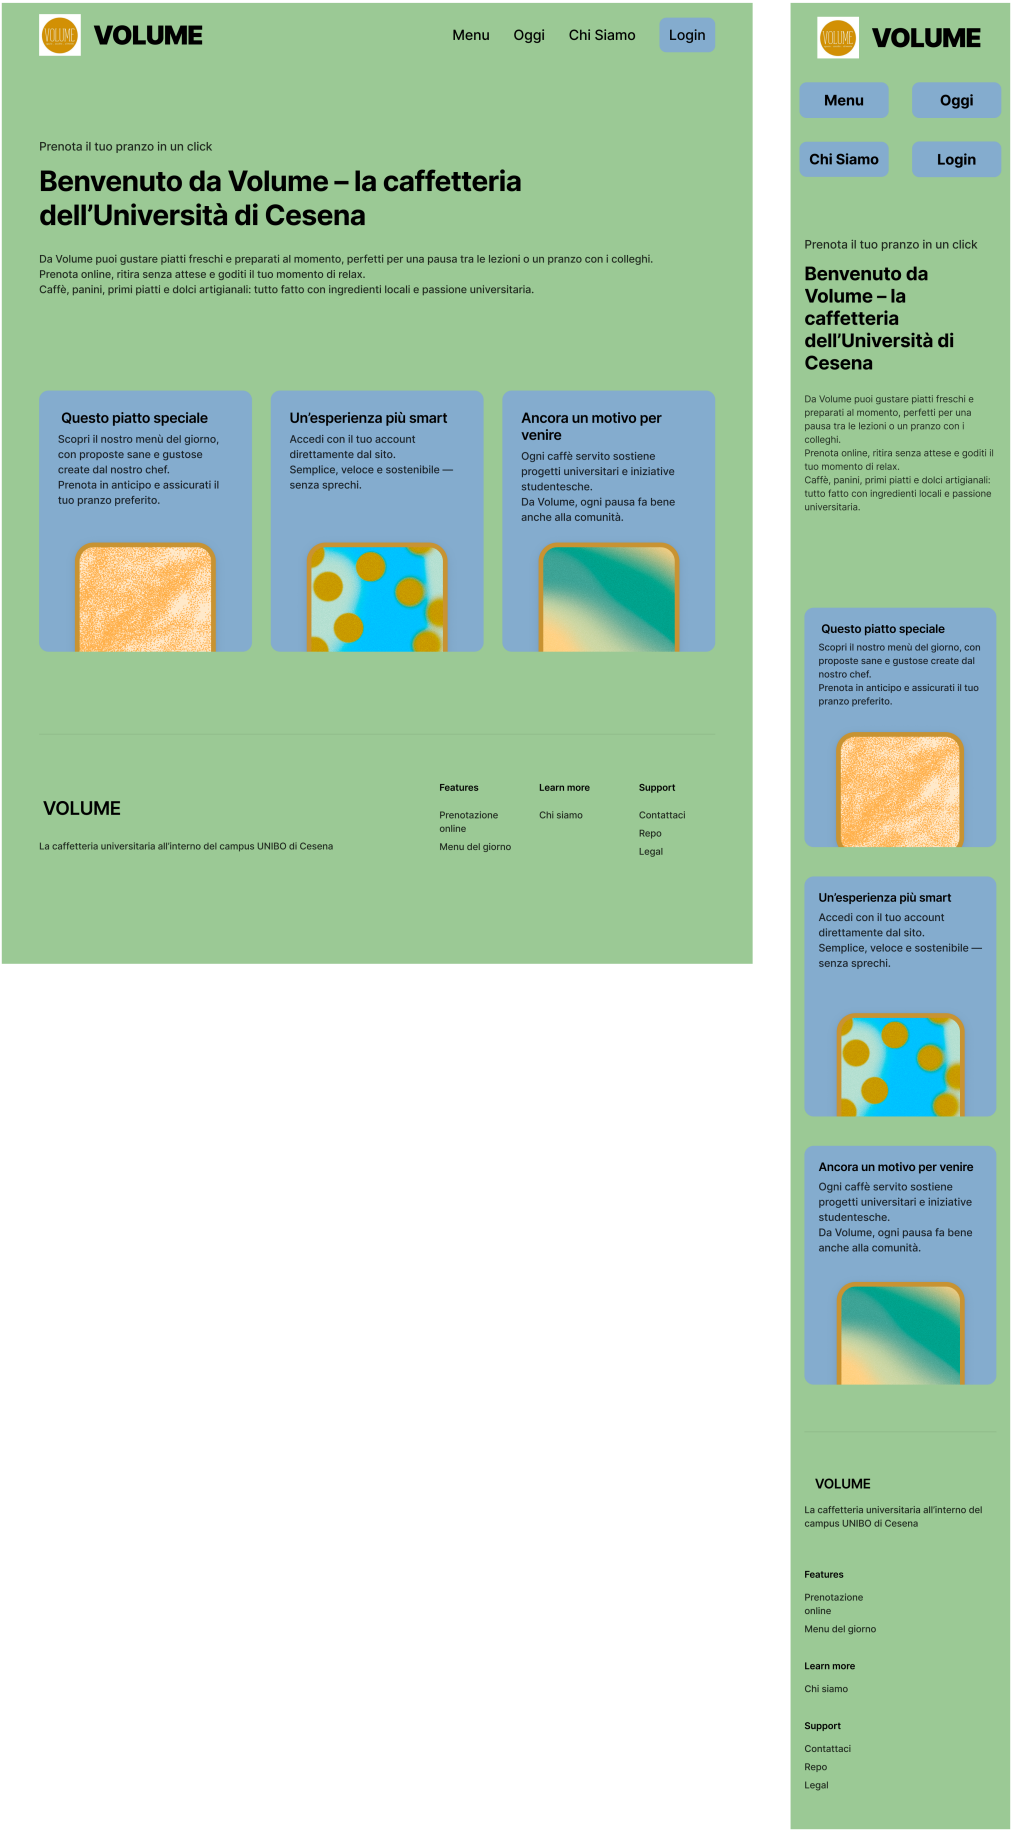

Figure 2: Green and Blue Version - Alternative color scheme exploration

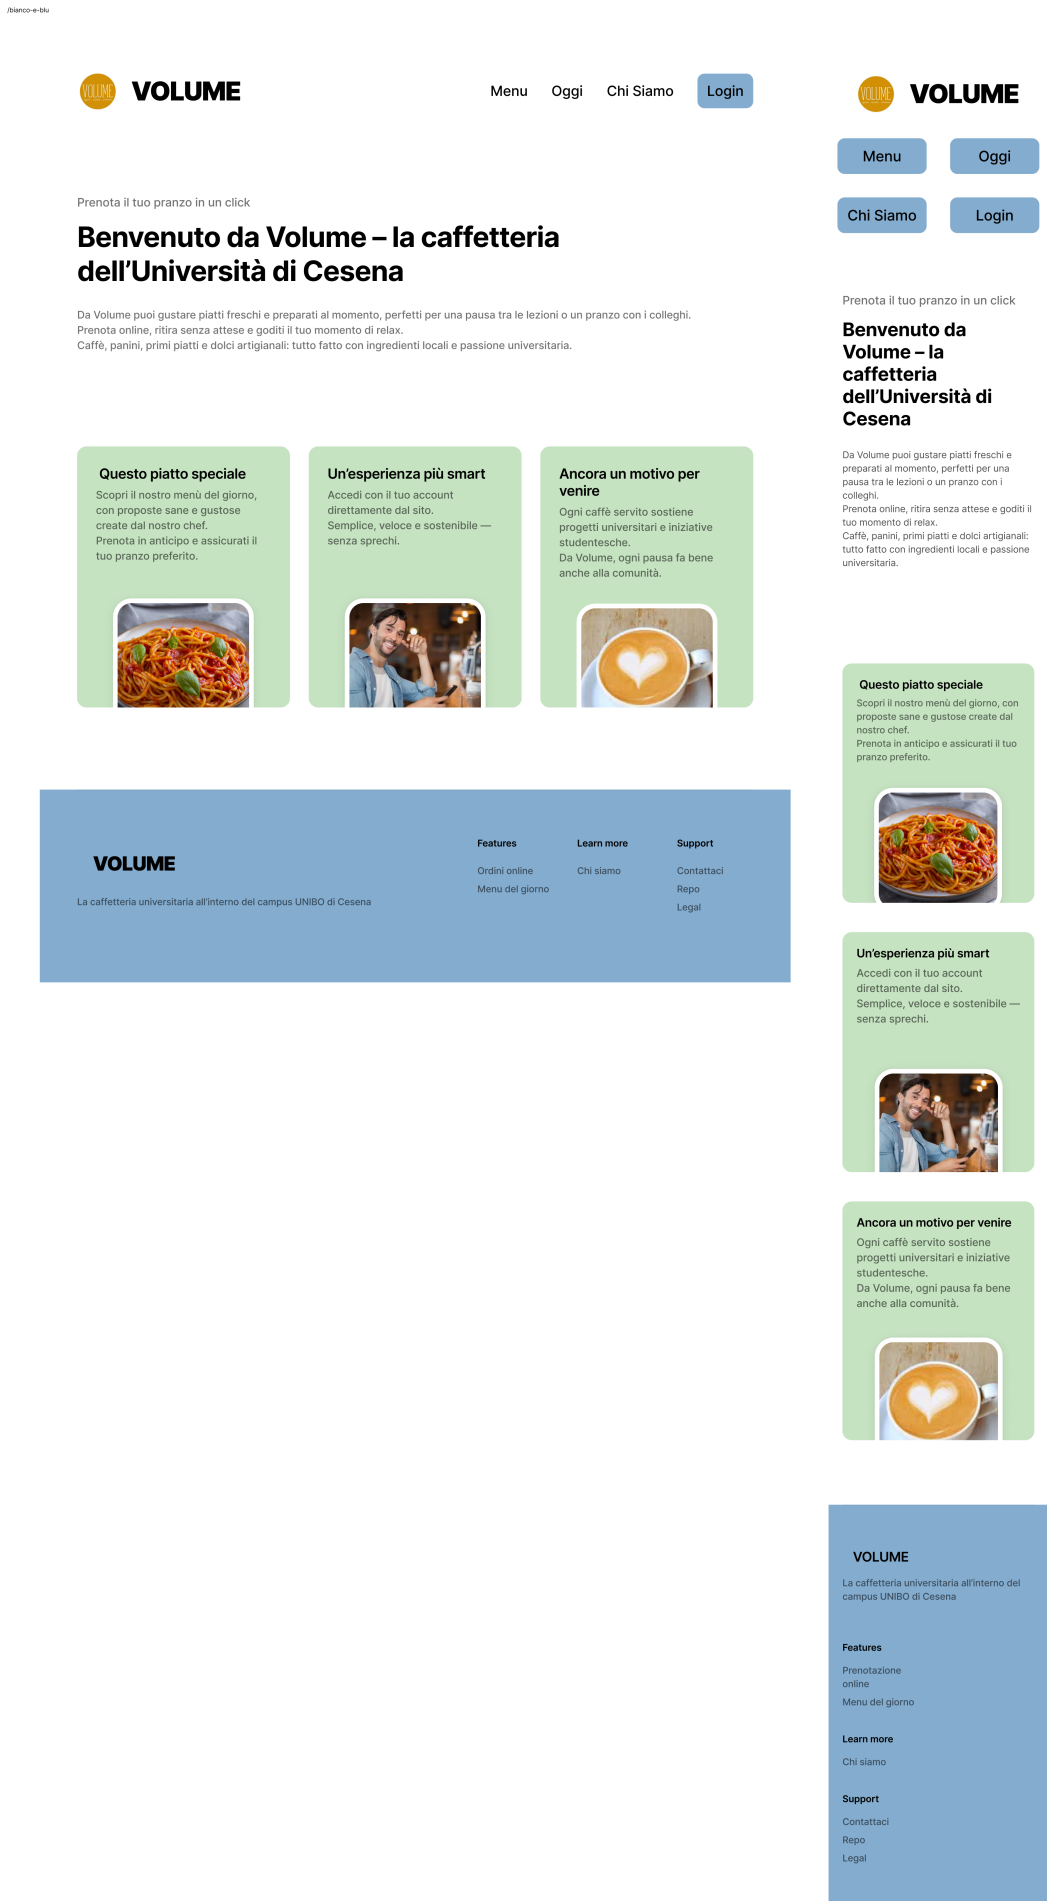

Figure 3: Final Chosen Version - Selected design balancing aesthetics and functionality

1.2 Final Implementation

The chosen design successfully integrates visual appeal with practical functionality, providing distinct interfaces for different user roles.
